

SPRINGBOARD 3.0 M

inkl.
Transportwagen

Springboard 3.0 freestanding

This mobile, free-standing diving board is a good alternative to large diving systems. Thanks to a built-in water tank (200 liters), the board has enough counterweight so that even adults can jump on it. However, we recommend that one There should be a water depth of at least 3 m.

The water tank can be emptied quickly using an outlet valve. The diving board then only weighs approx. 80 kg and can be moved easily and easily with a transport trolley. It fits through any door (total width 65 cm) and works well in adjacent rooms be accommodated.

**The springboard has been tested by RWTÜV Essen
and corresponds to the specifications of DIN EN 13451 - 10**

overall length	330 cm
