Springboard 2.0 free-standing item no. 12200

This highly flexible, free-standing springboard is intended as a training board for children in club or school sports. The coach has the opportunity to stand next to the jumper to provide assistance. Due to the board's very good spring properties, children quickly get a feel for diving boards at an early age.

With a small transport trolley, the sports equipment can be moved easily and without any problems.

It fits through any door (total width 65 cm) and can easily be stored in adjacent rooms.

Total length: 230cm
Board length: 200 cm
Board overhang: 40 cm
Height: 50cm
Width: 50cm
Weight approx.: 70 kg
Material: glass fiber reinforced plastic
Accessories: transport trolley
Approved: for people up to 50 kg body weight

Available in white for the base and blue RAL 5010 for the diving board.
Other RAL colors are also available on request.
