

AQUAPARKS 2023

Aquaglide

LIFE ON THE WATER

Headquartered in the heart of the Pacific Northwest and run by a team of watersports enthusiasts, Aquaglide exists for life on the water. Since 2004, we have been dedicated to developing the highest quality Aquaparks to meet the needs of commercial operators.

Our mission as industry leader is to build the best products utilizing innovative designs and patented technology while providing world-class customer service and support with availability in over 70 countries.

SUSTAINABILITY

At Aquaglide, nature is at the core of everything we do. We build products that are designed to get us outside, enjoying our most precious resource: water.

Unfortunately, human-induced climate change is an unavoidable fact of modern life, and threatens the places we love most. With this in mind, we aim to take every step we can to protect our one and only planet, and hope to inspire our community to become advocates for our natural spaces along the way.

Our mission of sustainability is to continually improve our processes and products, in both large and small ways. While we aren't perfect, we strive to be better every day, and each step forward is a step in the right direction.

THE AQUAGLIDE ADVANTAGE

OUR SERVICE

As an industry leader in aquapark customer care, we provide a premium level of service. We specialize in creating custom solutions for any location or size. Our team will guide you through feature selection and park design, all the way through installation and beyond.

OUR TECH

Through patented technologies, we provide products that are guaranteed to perform. Our commitment to using only the highest quality materials ensures both durability and safety. At the heart of every Aquaglide Aquapark is our proprietary Monsoon Spray and Trickle System with TRiB Solar Powered Gauges. Additionally our ISO certified Vario Lock Two-Step System™ allows for quick and secure in-water attachment, creating limitless park configurations.

OUR PROMISE

We promise to make the highest quality and safest products on the market. We promise to always be there when you need us. We promise to never lose our passion for innovation by continually pushing the limits of what is possible.

AQUAGLIDE SYSTEM

All Aquaglide park components feature innovative technology including drop-stitch on every connection, our patented velcro-free Vario Lock System™, and premium CX3 4P 31oz fabric. Our aquapark features are built to last and are sure to stand the test of time. These patented technologies paired with our comprehensive design and production system has earned us ISO/EN certification on all of our products.

ISO & EN CERTIFIED

Our products are third-party certified compliant with EN 15649 and EN / ISO 25649, the highest standards in the aquapark business.

THREE YEAR WARRANTY

3-year limited warranty against any manufacturing defects.

VELCRO FREE Vario Lock

Our unique Vario Lock cinch strap system sets the standard for safe, durable aquapark connections.

DROP-STITCH TECHNOLOGY

Hot-air welded with 3-layer seams and ultra-durable 2-layer fused construction for maximum longevity.

COMMERCIAL GRADE MATERIAL

Aquaglide play structures use CX3 Duratex material which features a thicker (0.9mm/ 31oz) 1000d polyester core.

INFINITE BOARDING SYSTEM

Industry leading low-profile connections allow endless opportunities to board the aquapark.

FEATURED TECHNOLOGY

MONSOON SPRAY SYSTEM

Aquaglide is the only manufacturer to offer a revolutionary misting/spray system built into their aquaparks, designed to reduce surface temperatures and decrease friction on slides. Irrigating a park with the patent-pending Monsoon system keeps pieces cool, increasing product lifespan and participant excitement. The innovative new spot-irrigation Mini Monsoon make the Monsoon System even more pivotal.

TRICKLER SYSTEM

A continuous trickle of water from the top of the popular slides, Jungle Joe TR, Freefall Supreme TR or Summit Express TR keeps the surface cool, clean and ready for action! The Trickler Kit can be used with standard garden hose attachments or easily integrated into an Aquaglide Monsoon System.

TRIB SOLAR-POWERED GAUGES

Maintaining proper working pressures is a critical part of operating any aquapark. Now, several Aquaglide products are fitted with integrated TRiB (pronounced 'tribe') solar-powered pressure gauges in critical chambers. The TRiB gauge uses patented technology to provide real-time readings of air pressure in the chamber, even while inflating and deflating. This is a huge time-saver for park operators and staff - found only with Aquaglide.

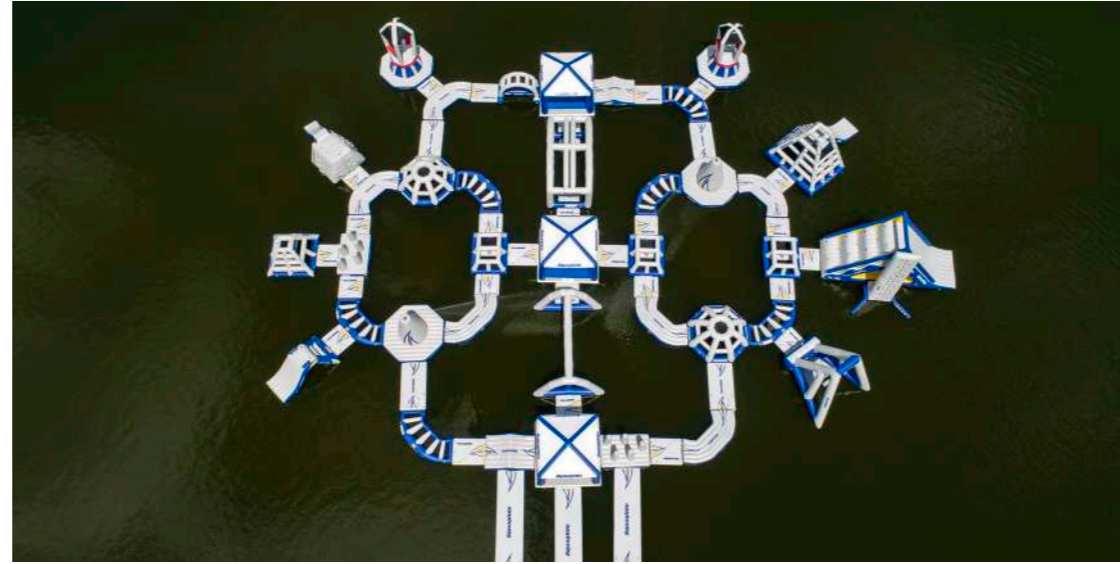

THE AQUA PIT - MICHIGAN, USA

DIAMANTE CRYSTAL LAGOON - CABO SAN LUCAS, MEXICO

LAKE LAS VEGAS - NEVADA, USA

SKYBEACH AQUAPARK - DUBROVNIK, CROATIA

CUSTOMIZABLE CONFIGURATIONS

With over 100 unique park features to choose from, the only limitation of your park is your imagination. Our ever-growing line of products allow for completely unique and customizable layouts thanks to our proprietary Vario Lock System™. We offer pre-configured park designs to choose from, each with several capacity options. Or, if you're looking for a fully custom configuration, we will provide professional consultation to design your dream park.

For nearly 20 years, we have been building custom aquaparks all over the world, from 5-star resorts to lakefront properties and everywhere in-between. Whether your location is big or small, shallow or deep, freshwater or saltwater, we offer a park build that fits your unique needs.

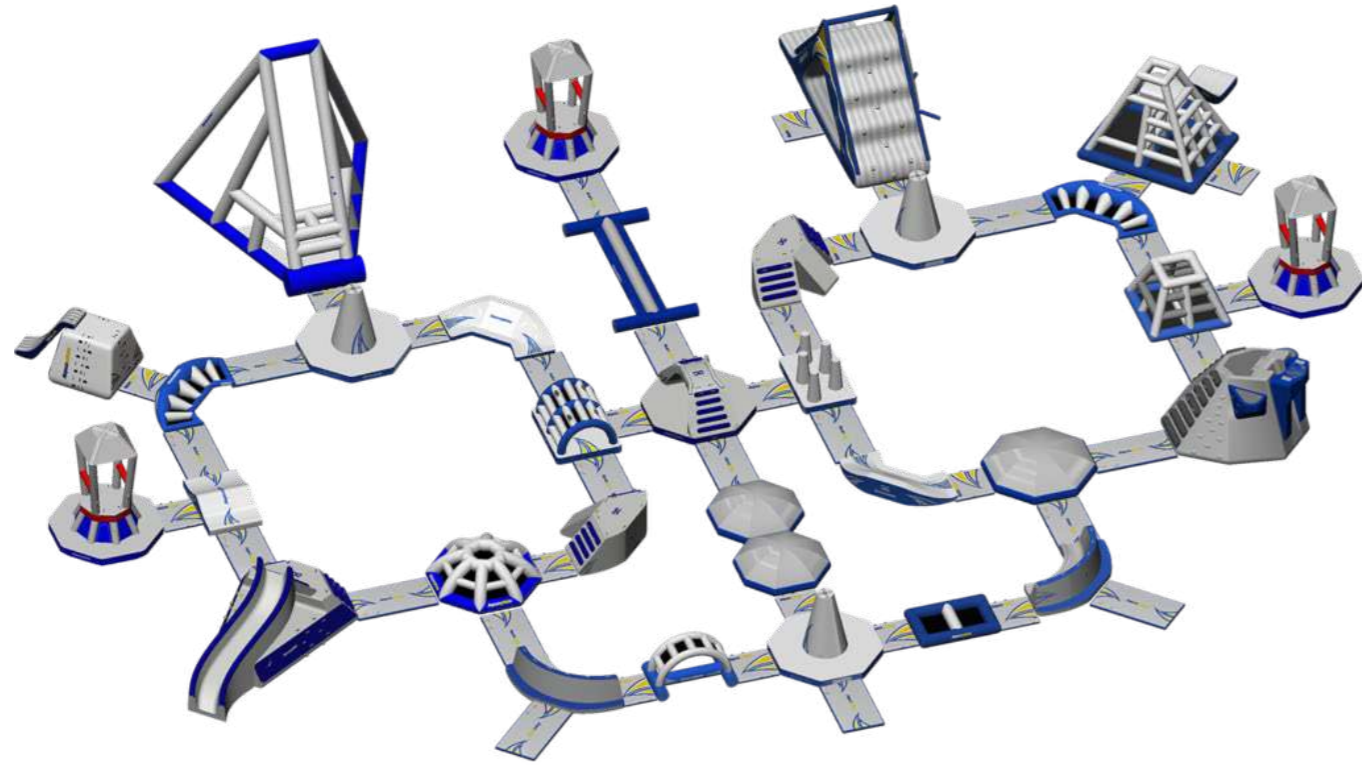

RING SERIES

Ring layouts are easy to distinguish due to their rounded corners and single or multiple loops, usually interconnected. With plenty of high excitement signature features, the pathways are also densely packed with a wide variety of moderate features, offering nearly continuous play as users move through the park.

This style allows for a larger park capacity per area than other designs. Ring series parks work best in busy, high volume commercial or resort operations that frequently run toward peak capacity.

Functionally, Ring series is more about “play-along-the-way.” Providing continual play value on the pathways keeps users dispersed and reduces over-concentration on key signature features. The ability to easily scale-up capacity without reconfiguring the original layout is also a huge plus.

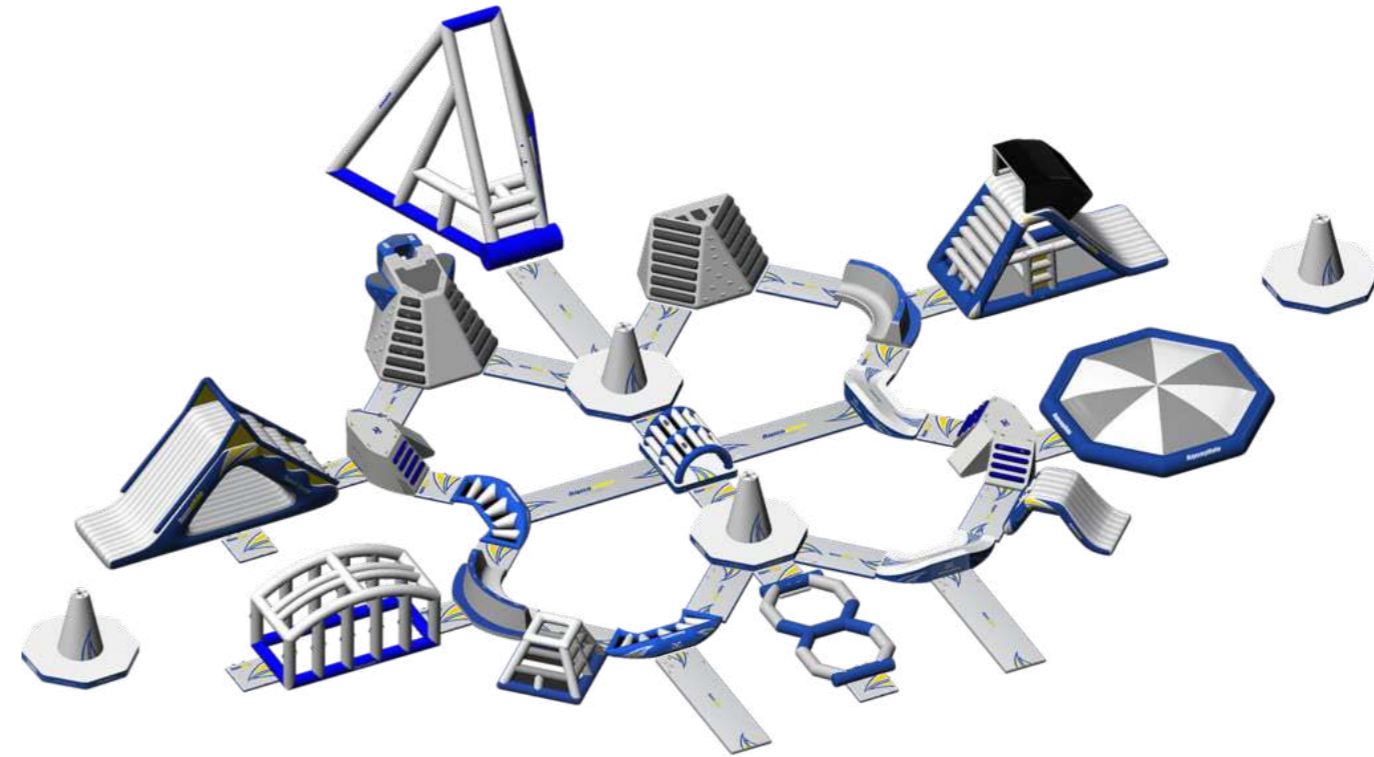

SERPENTINE SERIES

The newest addition to Aquaglide’s park design, Serpentine parks have a totally unique look. Made possible by a diversity of corner features, Serpentine layouts offer similar attributes to the Ring series, but with a one-of-a-kind meandering aspect to the park layout.

This style appeals to a wide range of age groups and can be custom tailored to high density, or more open layouts. The real advantage here is maximum ‘wow’ factor offered by presenting a diverse park in a completely unique layout.

Serpentine designs are the latest and greatest, and so they naturally appeal to those who want maximum excitement and maximum diversity in an aquapark layout.

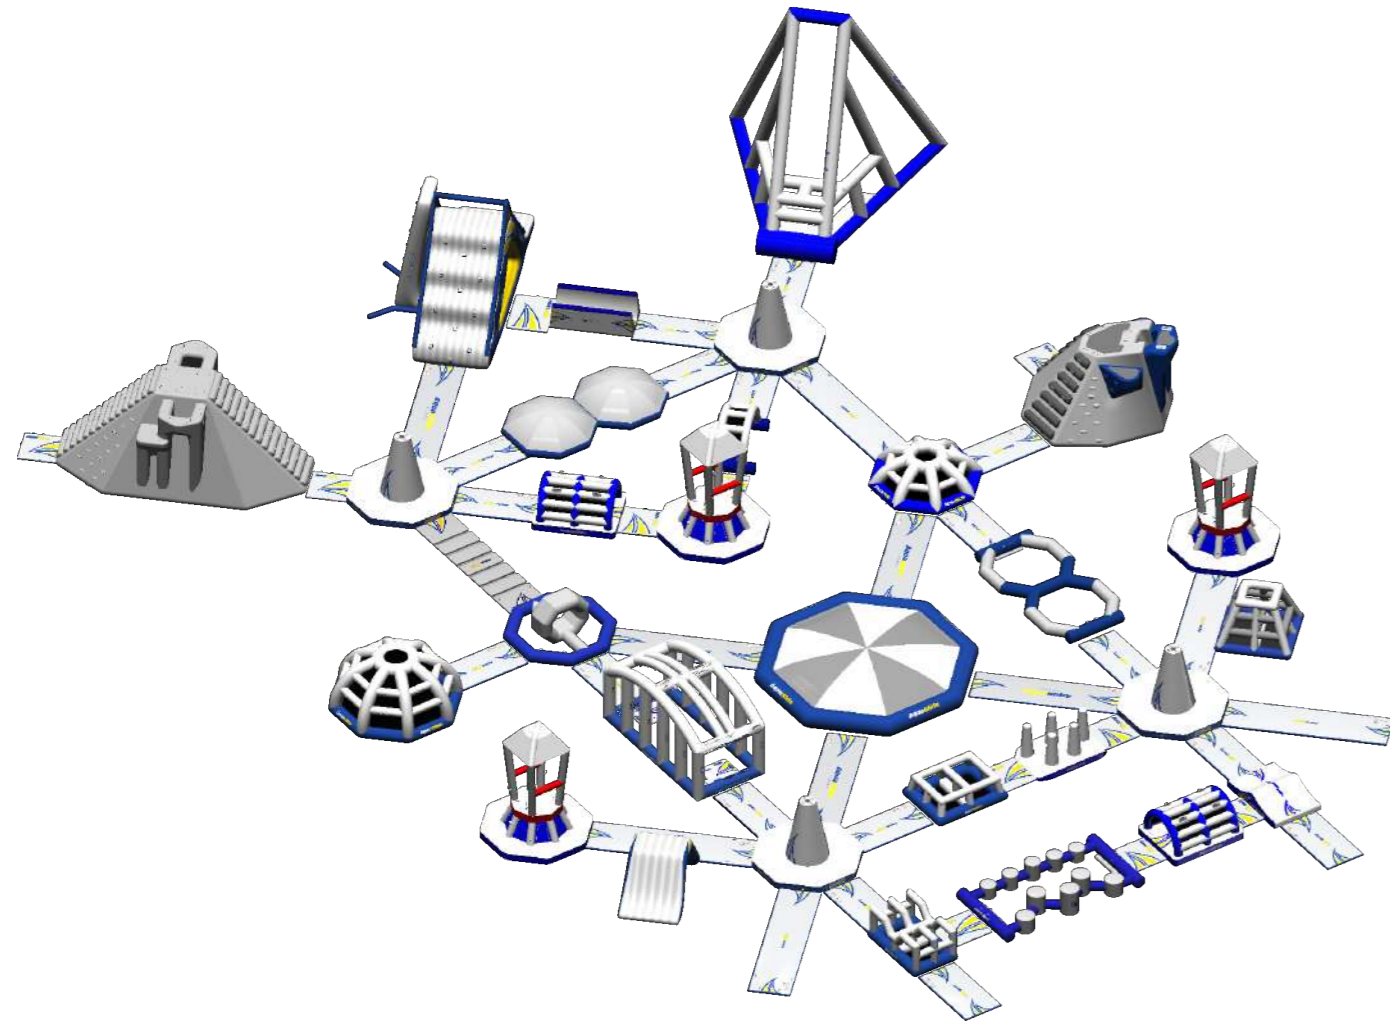

CIRCUIT SERIES

Circuit designs blend some of the best attributes of Micro and Ring layouts. Circuits frequently use a perimeter pathway interspersed with moderate challenge features and strategically placed high excitement signature items.

This style is a good choice for operators with widely fluctuating capacity; perhaps running lean during the week but maxed out during peak times. Circuit designs vary greatly, but generally appeal to a wide range of user groups.

By offering many attributes of Micro and Ring layouts, Circuits may be the most versatile and adaptable of the park design types.

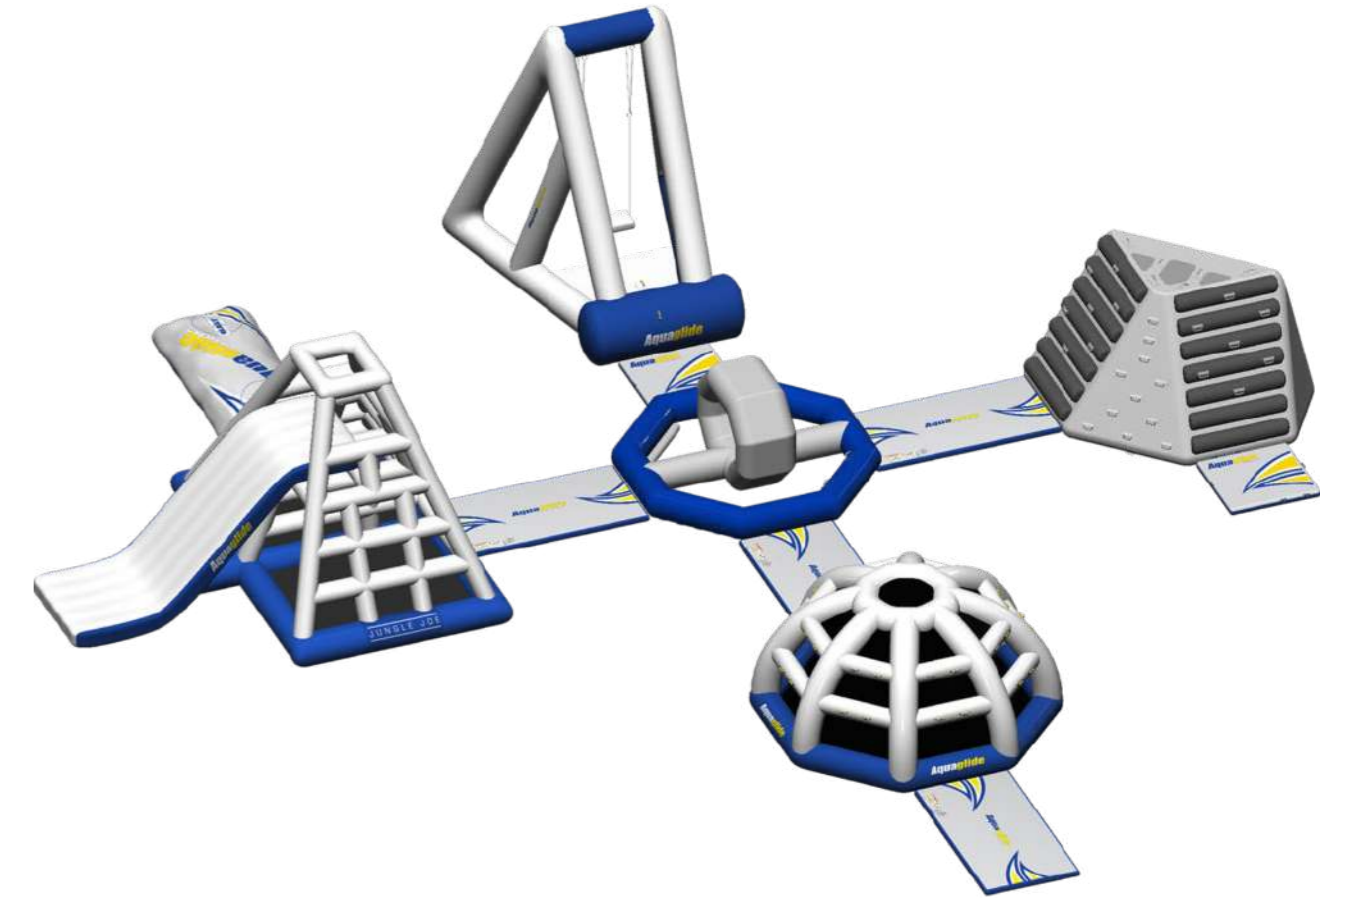

MICRO SERIES

As the name suggests, Micro designs are generally small to moderate in size and tend to emphasize maximum excitement happening at the main feature items. By minimizing pathways, these layouts are designed to provide maximum play value at a minimum cost.

This style works best for camps and moderate-volume commercial operators and can be easily fine-tuned to meet specific needs such as age-group, budget or target capacity. Micro designs are generally fit to a specific type of user (such as active, excitement-oriented teens) more than other park layouts.

In places where the priority is big excitement for a controlled number of users, Micro layouts provide maximum 'wow factor' to fit most budgets.

EXCITEMENT FOR ALL

HIGH PROFILE EXCITEMENT ZONES

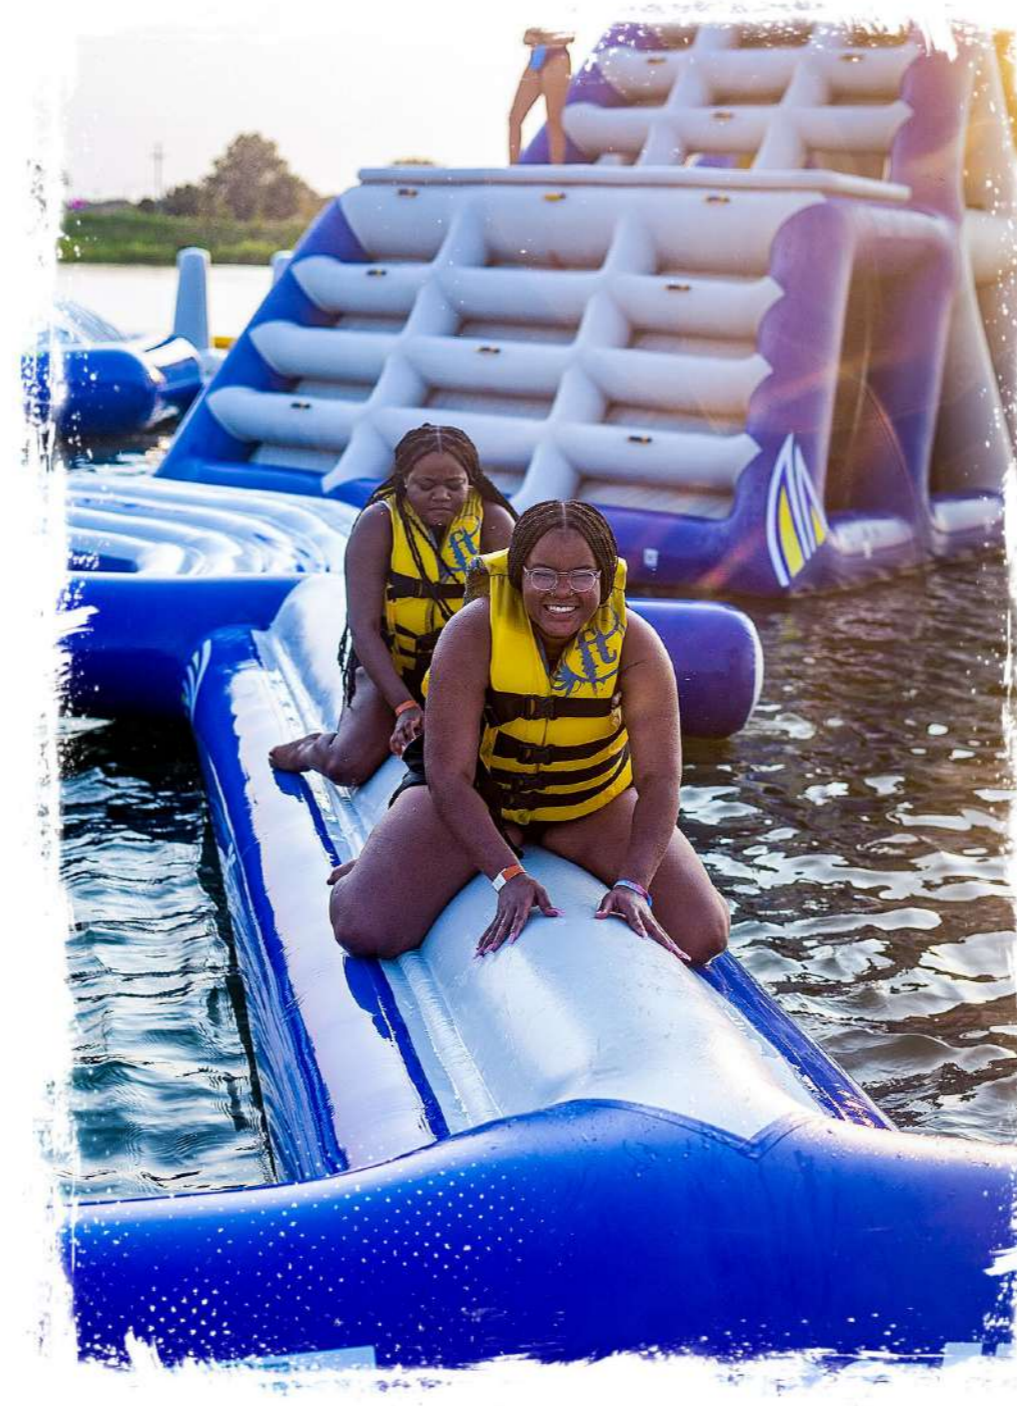

More daring participants are drawn to pieces offering excitement and height in deeper water. The large-scale features and demanding challenge sections in high profile zones provide big thrills for those confident enough to try them. Younger or more timid participants can also still explore and expand their level of play.

LOW PROFILE ZONES

This area serves as a destination for younger participants, as well as a resting and transitional zone. There's plenty of excitement to be had here, but the challenges are more moderate and social spaces more prevalent. Water depth transitions here from shallow to deep. Team-building and cooperation skills are emphasized.

INFINITE BOARDING ZONES

The boarding zone typically occupies shallow water depths and allows participants to safely transition to their preferred area in the park. This zone can also encourage young families and the smallest participants to test the waters of aquapark fun with low-profile challenges and comfortable resting spaces.

2023

AQUAPARK PIECES

Aquaglide is always innovating and pushing the boundaries of what's possible. We constantly develop new products, keeping even the most seasoned park attendee coming back for more. In the following pages, you will find our 2023 product line - starting with our newest features and followed by our established products.

NEW

ARETE 20

All new Arete 20 provides an extended, lateral-climbing obstacle as users transit challenging ledges on each side. Adds diversity to any aquapark in the large track footprint, while providing two needed bridges for ingress/ egress of enclosed aquapark rings. Use the Arete 20 as a standalone feature or connect it to other Aquaglide Aquapark features using the D-Ring Interloc system.

INFO:

DIMS: L 20' x W 8.1' x H 6'
(L 6,1m x W 2,5m x H 1,8m)

CAPACITY:
5 Adults or 5 Children

MINIMUM WATER DEPTH: 6ft (1,82m)

ITEM #: 585223103

NEW

ARETE 10

All new Arete 10 provides a unique lateral-climbing obstacle as users transit challenging ledges on each side. Adds diversity to any aquapark in the small track footprint, while providing a needed bridge for ingress/ egress of enclosed aquapark rings. Use the Arete 10 as a standalone feature or connect it to other Aquaglide Aquapark features using the D-Ring Interloc system.

INFO:

DIMS: L 10' x W 8.1' x H 6'
(L 3m x W 2,5m x H 1,8m)

CAPACITY:
3 Adults or 3 Children

MINIMUM WATER DEPTH: 6ft (1,82m)

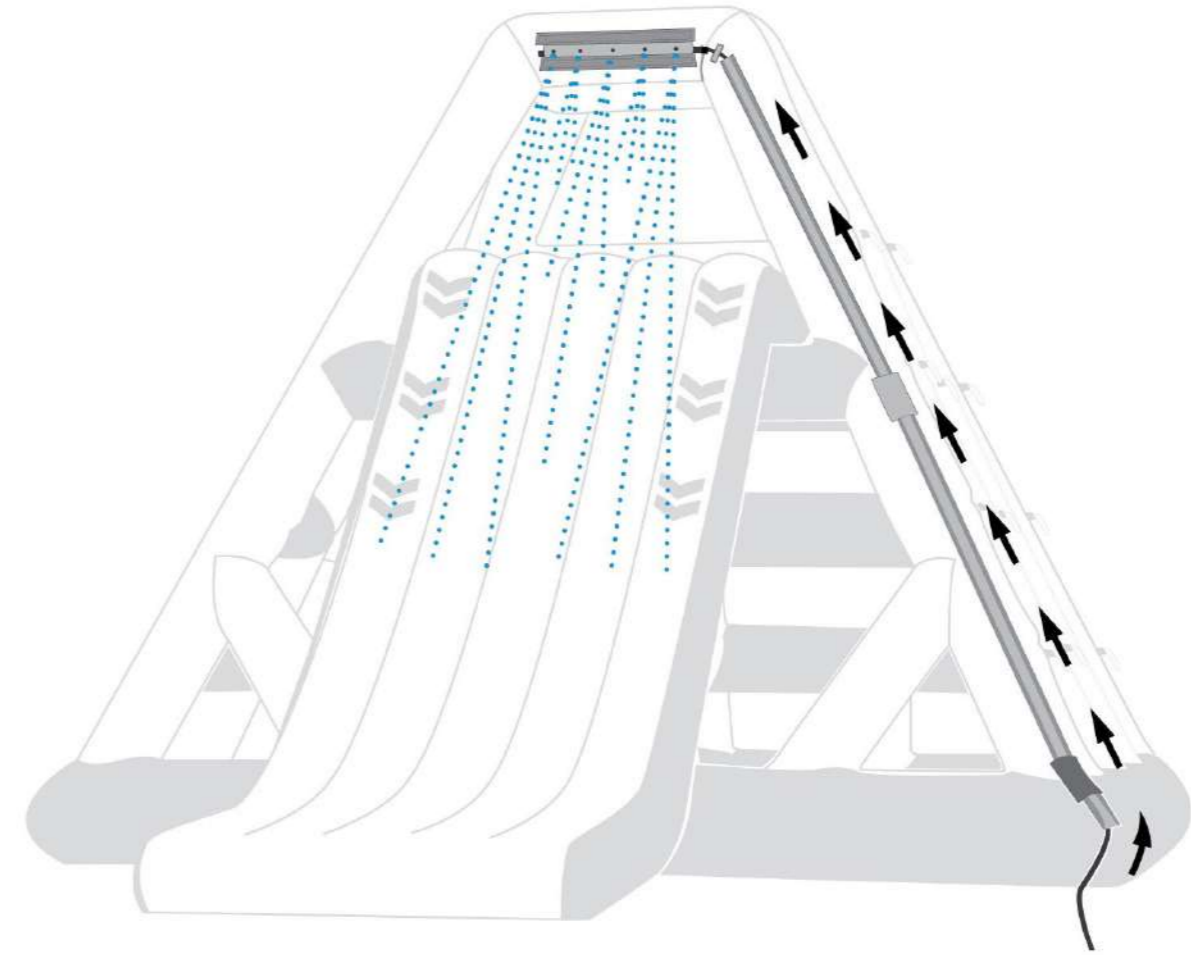

ITEM #: 585223102

NEW

TRICKLER SYSTEM

A continuous trickle of water from the top of the Jungle Joe TR, Freefall Supreme TR or Summit Express TR slides eliminates potential for skin burn, keeps surface cool, clean and ready for action! Easy operator installation into any Jungle Joe, Freefall Supreme TR or Summit Express "TR" version. The Trickler Kit can be used with standard garden hose attachments or easily integrated into an Aquaglide Monsoon System.

TRICKLER READY SIGNATURE ITEMS:

- JUNGLE JOE TR
- SUMMIT EXPRESS TR
- FREEFALL SUPREME TR

NEW
MINI MONSOON

Expanding on Aquaglide's revolutionary patent-pending Monsoon Sprinkler System is the Mini Monsoon. The compact Mini Monsoon is perfect for spot irrigation of specific or difficult to reach surfaces, or it can be used as general irrigation of smaller parks. It offers the same cooling spray as the larger Monsoon keeping users comfortable, equipment clean, and maximizes the wow-factor of sliding surfaces throughout the park. The Mini Monsoon works independently with or without any Aquaglide Aquapark items.

Note: Inline Monsoon Tee sold separately.

INFO:
